

# COLOCATION

## SECURITY

- Protection by electronic and biometric systems
- Cage level control
- Cage material choosing options
- 24x7x365 security
- Motion detection
- CCTV on / coverage of entire centre

## WE ARE FLEXIBLE

Choose what's best for your business

## SHARED AND DEDICATED RACK SPACE

- 1U to 42U options available with required power configuration.
- Vertical/Horizontal power strips with IEC or Indian type power socket.
- Racks with electronic or biometric access control.
- Both rated and metered AC and DC power.

We can also provide

## CROSS CONNECTS

We provide cross connects to enable customers to connect between floors. We deliver these over copper and/or fiber to link our partners with carriers and internet service providers.

## Your mission critical data is in right hands

Data volumes and storage needs are soaring. So are overheads, compliance requirements, and cyber-attacks. So why not let Nxtra help you?

Nxtra Data is a fully owned subsidiary of Bharti Airtel having 10 datcenters across 7 strategic locations in India. We are India's most trusted name for datacenter services and can provide you a secure environment for your company's most precious assets that is "Your Data". Whether you are seeking primary, secondary or multi-site colocation solutions, you will find all you need and more at Nxtra Data Limited.

We build and operate level III datacenters with the highest level of security, control and flexibility across India. We are also aligned to custom requirements and can build Datacenters as per customer's specifications.

## CAGED SERVICES / DEDICATED DC SUITES

- Cage any number of racks or request dedicated DC suites.
- Cage level dedicated electronic and biometric access control.
- Dedicated IP cameras which can run on your own network providing 24\*7 real time viewing of your cage or dedicated DC suite.
- Option to choose your own specifications of caging material.

## REMOTE HAND SERVICES

Our team of highly trained experts provides 24x7 remote hand services to our customers throughout the year. We provide assistance for remote management, custom installations, and troubleshooting. Services range from performing an emergency replacement to onsite technical assistance.

## BENEFITS

- DCIM (Datacenter infrastructure management) is available, which allows you to analyze the entire datacenter in one go, making it faster, simpler and smarter.
- N+1 redundant environment for ultra-reliable operations.
- Cost effective strategy that will enable you to quickly ramp up expanding IT infrastructure and meet increased demands.
- Multicarrier Network reliability and availability.
- Precise control of temperature and humidity.
- Dedicated seating space availability.
- Reliable and seamless service by our local and central help desk.

## WHAT DIFFERENTIATES NXTRA? – OUR DESIGN EFFICIENCY

Nxtra's datacenters are designed and operated by the best engineers in the business. This helps us to achieve and sustain a design efficiency and we pass on the benefit to you.

Low loss distribution

Surge protection installed at source

Condenser water cooling on UPS power incase power failure

Robust system to provide stable, temperature and humidity

Planned cabling techniques under the floor minimise interference

Low loss distribution of power from source to load using BBT technique
