

# NXTRA CLOUD SERVICES

## FAST TRACK YOUR BUSINESS GROWTH

Nxtra Data is enabling the cloud transition for enterprises across India, addressing their business and IT objectives and building an optimal cloud environment for their complex needs. We provide a tailored approach to creating an infrastructure that supports scalability, performance, and security needs of enterprises by harnessing the public, private, and hybrid cloud platforms. Our strong Telecom/ISP lineage from parent company Bharti Airtel has helped us become one of India's most trusted cloud services provider in a short time.

## KEY FEATURES

- » Massively Scalable
- » Pay As You Go
- » Enterprise Grade
- » Comprehensive Management
- » Highly Secure
- » MeitY Empaneled

**PUBLIC CLOUD | PRIVATE CLOUD | HYBRID CLOUD | MULTI CLOUD**

## NXTRA PUBLIC CLOUD

Get high power computing, storage, networking, and analytics resources to build a scalable cloud solution and maximize resource utilization without any operational burdens. As a future-ready IaaS platform, Nxtra Public Cloud gives you unmatched agility in provisioning and management of your infrastructure with a self-service portal. You can scale up or down, as and when required.

- » Connectivity agnostic - MPLS, Dedicated Internet, P2P, etc.
- » Highly flexible compute plans
- » Free data transfer till 1 TB
- » Most economical
- » Reduced TCO, higher ROI
- » Self-service portal
- » Simplified provisioning & management of resources

## NXTRA PRIVATE CLOUD

Nxtra Data provides a dedicated computing setup for your critical applications, sensitive data, legacy systems, and other custom requirements. You can choose your hardware and networking nodes to meet your security, performance, and compliance needs. Nxtra Private Cloud supports ERP suites, core banking solutions, BI, Big Data, and other advanced applications for leading enterprises in India.

- >> Supporting all leading OEMs
- >> Enterprise-grade security and compliance
- >> Optimized IT environment
- >> Effortless integration and manageability
- >> Flexibility

## NXTRA HYBRID CLOUD

Nxtra Hybrid Cloud provides an agile approach to innovation and digital transformation. You can easily employ both the private and public clouds for your varying workloads and application requirements. Also, you get higher integration and optimization of resources to support your complex application and data ecosystems.

- >> Expertise in multiple hypervisor deployments
- >> Network strength doubled with connectivity agnostic solution
- >> High scalability
- >> Integrated failbacks for reliability

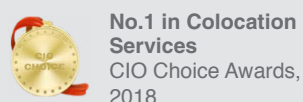

## NXTRA MULTI CLOUD

Nxtra's Multi Cloud managed service provides you end-to-end cloud lifecycle management. We offer you the flexibility to choose cloud services best suited for your applications, workloads, and business requirements. You can select between Nxtra's cloud services, Amazon Web Services, Microsoft Azure, Google Cloud Platform, and Alibaba Cloud to build your preferred ecosystem.

- >> IaaS, PaaS & SaaS across the globe
- >> Disaster Recovery Solutions
- >> Managed Services
- >> Backup Services
- >> Cloud Optimization
- >> ERP Deployments
- >> Big Data Solutions
- >> Storage & Archival Solutions

## ABOUT US

Nxtra Data is a fully owned subsidiary of Bharti Airtel. We support leading enterprises, SMBs, global customers, and government institutions in India with our data center services. We offer an integrated portfolio of colocation services, along with cloud infrastructure, managed hosting, data backup, disaster recovery, and remote infrastructure management.
